

DELHI PUBLIC SCHOOL NEWTOWN
SESSION 2023-24
MONDAY TEST

CLASS: X
SUBJECT: ENVIRONMENTAL SCIENCE

FULL MARKS: 40
DATE: 03.10.2023

General Instructions:

- The paper consists of two printed pages.
- Answers should be to the point.
- Copy the question number carefully before answering the questions.

SECTION A (20 Marks)

QUESTION 1

Choose the correct answer from the given options:

[1×8=8]

- i. Which of the following is a non-conventional source of energy?
 - a) Water
 - b) Boiler
 - c) Thermal
 - d) Solar
- ii. Consider the following statements
 - A. There is infinite storage of fossil fuel in the earth's crust.
 - B. There is no problem in harnessing nuclear energy as safe disposal of spent fuel is very easy.
 - C. Hydro and wind energy plants cannot be considered as polluting sources of energy.
 - D. Sun may be considered as an inexhaustible source of energy.

The correct statements are

 - a) A and D
 - b) B and C
 - c) C and D
 - d) A,C and D
- iii. The biggest obstacle in managing municipal solid waste in India is
 - a) Segregation
 - b) Collection
 - c) Transportation
 - d) Disposal
- iv. Which of the following is a hygienic way of disposing organic waste?
 - a) Composting
 - b) Incineration
 - c) Sanitary landfill
 - d) Vermiculture

- v. Both power and manure is provided by
 - a) Biogas plant
 - b) Nuclear plant
 - c) Thermal plant
 - d) Hydroelectric plant
- vi. When the organic matter in the sanitary landfill decomposes, it generates
 - a) Methane
 - b) Nitrogen
 - c) Hydrogen
 - d) All of the above
- vii. Photovoltaic energy is the conversion of sunlight into
 - a) Geothermal energy
 - b) Electricity
 - c) Biogas
 - d) Chemical Energy
- viii. The organic matter of the solid waste will decompose
 - a) By the flow of water
 - b) By the soil particles
 - c) By the action of microorganisms
 - d) By oxidation

QUESTION 2

[2×6=12]

- a) Hazardous wastes can be treated by physical, thermal, chemical and biological means. In this context, explain how wastes can be treated by incineration. State one disadvantage of the process.
- b) State any two advantages of coal as a non-renewable source of energy.
- c) Why is open dumping not a preferred method of waste disposal?
- d) What is the composition of Gasohol? Mention one reason for which it still lacks prominence as a fuel.
- e) What are energy plantations?
- f) State any two practices you follow at home that helps in energy conservation.

SECTION B (20 Marks)

QUESTION 3

- a) In the present day world, every household generates waste day-in and day-out. Ours is a consumerist society where 'use and throw' is done without sparing a thought for the environment. In this context, state why the concept of 'use and throw' is bad. Discuss the four tenets of waste management. [5]
- b) How is the alternative fuel ethanol produced? Mention two advantages and two disadvantages of the same. [5]

QUESTION 4

- a) Write a short note on Chernobyl disaster. [5]
- b) Biotechnology plays a very important role in sustainable waste management. Comment. [5]
