- (v) (a) Calculate the area between the Eastings 31 and 35 and the northings 86 and 89 in kilometre. [2]
(b) What does $\triangle 192$ in the grid square 3087 mean?

Question 2

On an outline map of India provided:

[10]

- (i) Mark and label Indian Standard Meridian.
- (ii) Mark and label Konkan coast.
- (iii) Mark and name the highest peak in India in the Himalayas.
- (iv) Shade and label Gulf of Mannar.
- (v) Shade and label a densely populated area in South India.
- (vi) Shade and label a black soil area of India.
- (vii) Mark with a dot and name the capital of Punjab.
- (viii) Mark with arrows and name the winds which give rainfall to Gujarat in June.
- (ix) Mark with a dot and name the iron ore mine.
- (x) Mark and label river Ghaghra.

Question 3

Choose the correct option :

[10]

(Do not copy the question, write the correct answers only.)

- (i) Which of the following is the CORRECT set of states that receive heavy rainfall?
 - (a) Karnataka and Tamil Nadu
 - (b) Tamil Nadu and Telangana
 - (c) Kerala and Meghalaya
 - (d) Meghalaya and Uttar Pradesh
- (ii) Which soil is widespread in West Bengal?
 - (a) Black
 - (b) Red
 - (c) Laterite
 - (d) Alluvial
- (iii) Pneumatophores are found in which of the following trees?
 - (a) Teak
 - (b) Sundari
 - (c) Mahogany
 - (d) Neem
- (iv) Assertion (A): Cherrapunji, which receives about 11000 mm of rainfall annually suffers from acute shortage of drinking water.
Reason (R): In India, the distribution of rainfall is quite uneven.
 - (a) Both A and R are correct and R is the correct explanation of A.
 - (b) Both A and R are correct and R is not the correct explanation of A.
 - (c) A is correct but R is incorrect.
 - (d) R is correct but A is incorrect.

- (v) Which of the following is NOT a non metallic mineral?
 (a) Coal
 (b) Petroleum
 (c) Limestone
 (d) Bauxite
- (vi) Stagnant water is required for the cultivation of _____.
 (a) Rice
 (b) Mustard
 (c) Wheat
 (d) Cotton
- (vii) Which state is the leading producer of sugarcane?
 (a) Maharashtra
 (b) Tamil Nadu
 (c) Uttar Pradesh
 (d) Gujarat
- (viii) _____ industries are the means by which people with limited resources can pool their physical and material resources.
 (a) Village
 (b) Joint Sector
 (c) Cottage
 (d) Co-operative Sector
- (ix) The world's highest road from Manali (Himachal pradesh) to Leh (Ladakh) was constructed by:
 (a) NHDP
 (b) BRO
 (c) NHAI
 (d) PWD
- (x) _____ involves microorganisms to break down waste.
 (a) Composting
 (b) Segregation
 (c) Incineration
 (d) Dumping

PART II (50 marks)

(Attempt any five questions from this part.)

Question 4

- (i) *According to the latest projections from the National Oceanic and Atmospheric Administration's climate prediction centre, the Northern Hemisphere may experience a "strong" El Nino from March to May 2024, with a 1 in 3 chance of it being 'historically strong' (Super El Nino).* [2]

- October 16, 2023 Times of India.

- (a) What is El Nino?
 (b) How does El Nino influence the climate of India?
- (ii) On the basis of South West Monsoon, answer the following: [2]
 (a) Mention the months in which these winds blow.
 (b) Why is it entering the Northern Plains of India from the South East direction?
- (iii) Give a geographic reason for each of the following: [3]
 (a) Mangaluru is cooler than Jaipur in summer.
 (b) Many flights to Chennai get cancelled in winter months.
 (c) The North western part of India has low pressure conditions in summer.
- (iv) Study the climatic data of station X and answer the following questions: [3]

Month	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Temp (°C)	-20.6	-17.6	-14.7	-9.7	-3.9	2.9	9.3	10	5	-3.8	-12.4	-18.8
Rainfall (cm)	3.5	4.3	4.5	4.5	4.5	4.3	5.3	6.4	3.7	1.9	2.0	2.5

- (a) What is the annual range of temperature of station X?
 (b) Suggest a probable name for the station with reason.
- Question 5**
- (i) State four factors which make soil fertile. [2]
 (ii) *The Government of Rajasthan signed a Memorandum of Understanding (MoU) with Isha Outreach to conserve soil in the state making Rajasthan the second Indian state after Gujarat to officially join the Global Movement to Save Soil.* [2]
 (a) Why is it necessary to conserve soil?
 (b) State two ways of soil conservation in Rajasthan.
- (iii) With reference to alluvial soil, answer the following: [3]
 (a) What are the two types of this soil on the basis of its age?
 (b) State its mineral composition.
 (c) Why is this soil easily tillable?
- (iv) Give a reason for the following statements: [3]
 (a) Red soil is found on the plateau region of peninsular India.
 (b) Laterite soil is not fertile.
 (c) Northeastern parts of India are affected by soil erosion.

Question 6

- (i) (a) Name the forest which has hard wood trees with broad leaves and are found in pure stands. [2]
 (b) What are the geographical requirements for the growth of this vegetation?
- (ii) (a) Why are tropical thorn forests found in southwestern Punjab and Haryana? [2]
 (b) How forests help in increasing the soil fertility?

- (iii) State one area each in India where the following vegetation are found: [3]
(a) Teak
(b) Ebony
(c) Keora

- (iv) What is agro-forestry? State its two objectives. [3]

Question 7

- (i) (a) What is watershed management? [2]
(b) Name any two traditional methods of rainwater harvesting in India.
- (ii) Distinguish between well irrigation and tubewell irrigation. [2]
- (iii) Why are canals mainly found in the Northern Plains of India? Mention two disadvantages of canal irrigation. [3]
- (iv) Why is there a need to conserve water in India? (Three points) [3]

Question 8

- (i) (a) Name the mineral which is black, hard and iron-like metal which occurs as natural oxide. [2]
(b) State two areas in Jharkhand where coal is found.
- (ii) (a) Name the source of energy produced by anaerobic degradation of animal and plant wastes in the presence of water. [2]
(b) Which state is the largest producer of petroleum in India?
- (iii) (a) What makes haematite good quality iron ore? [3]
(b) Mention two advantages of non conventional sources of energy.
- (iv) (a) Write any two uses of aluminium. [3]
(b) Why are wind farms installed in coastal regions and open grasslands?

Question 9

- (i) (a) With which crop is 'RETTING' associated? [2]
(b) State any two geographical requirements for the cultivation of this crop.
- (ii) (a) Mention any two types of coffee cultivated in India. [2]
(b) Name the state that is the leading producer of coffee in India.
- (iii) *The year 2023 has been declared by the United Nations as the International year of the millet, following a proposal by India, which wants to position itself as a global hub for millets. "Millets can play an important role and contribute to our collective efforts to empower small holder farmers, achieve sustainable development, eliminate hunger, adapt to climate change, promote biodiversity and transform agrifood systems," says FAO Director-General QU Dongyu.* [3]

-The Hindu

- (a) Name any two millets cultivated in India.
(b) Which soil is suitable for its cultivation?
(c) Why are they referred to as "food grains of the poor"?
- (iv) State the steps taken by the government in solving problems of sugarcane cultivators in India. [3]

Question 10

- (i) Describe any two commercial factors which influence the location of industries. [2]
- (ii) Differentiate between public sector industries and joint sector industries with example. [2]
- (iii) With reference to cotton textile industry, answer the following: [3]
 - (a) Which state is the leading producer of cotton textile in India?
 - (b) What are the problems of this industry in India? (Two points)
- (iv) (a) How is the electronic industry playing an important role in the development of a country? [3]
 - (b) Give two reasons which have made the sugar industry migrate to the south.

Question 11

- (i) Mention two advantages of road transport. [2]
- (ii) What is a port? Name one port on the east coast of India. [2]
- (iii) Give reasons for the following: [3]
 - (a) Air transport is growing in importance in India even though it is expensive.
 - (b) The northern plains of India has a maximum number of roads.
 - (c) The railways help in accelerating the development of industry and agriculture.
- (iv) Write any three disadvantages of water transport. [3]

Question 12

- (i) Describe the human activities which cause the following: [2]
 - (a) Eutrophication
 - (b) Acid rain
- (ii) "There is an urgent need for management of waste." Elaborate the statement with two reasons. [2]
- (iii) *"Mum, can I please play for a bit longer?"* [3]

That is the refrain that six-year-old Vanraj's mother, Pakhi Khanna, is bracing herself to deal with for the next couple of days in the Indian capital Delhi. The 38-year-old has cut her son's outdoor playtime to 30 minutes from two hours; his classes have shifted online this week, and football coaching has been called off.

Vanraj is among thousands of schoolchildren in Delhi whose schedules have abruptly changed due to air pollution rising to alarming levels. Over the past few days, Delhi's Air Quality Index (AQI) - which measures the level of PM 2.5 or fine particulate matter in the air - has consistently crossed the 450 mark, nearly 10 times the acceptable limit.

-10th November 2023, bbc.com

- (a) What according to you may be the reason for the poor air quality in Delhi?
- (b) How is it affecting the health of people in Delhi?
- (c) As a student, what can you do to control air pollution?
- (iv) What is E-waste? Write any two problems created by this waste. [3]
