Question 3

- (i) Define labour. Explain any four causes of low level of efficiency of workers in India. [7]

- (ii) Read the extract given below and answer the questions. [8]

A construction manager needs to construct a new building. The building needs to have electricity, running water, a solid foundation, and an attractive, functional interior, among other things. He realizes that in order to accomplish this, he needs masons, plumbers, carpenters, electricians, painters, and interior designers. These different workers come together and use their specialized skills to create the final product: a new building.
