

DELHI PUBLIC SCHOOL NEWTOWN
SESSION 2025-26
HALF YEARLY EXAMINATION

CLASS: X
SUBJECT: GEOGRAPHY (SET A)

FULL MARKS: 80
TIME: 2 HOURS

*Answers to this Paper must be written on the paper provided separately.
You will not be allowed to write during the first 15 minutes.
This time is to be spent in reading the question paper.*

*The time given at the head of this Paper is the time allowed for writing the answers.
Part I is compulsory. All questions from Part I are to be attempted.
A total of five questions are to be attempted from Part II.
The marks intended for questions are given in brackets [].
This paper consists of five printed pages.*

PART I (30 marks)
(Attempt all questions from this Part.)

Question 1

Study the map extract G43S10 of the Survey of India and answer the following questions:

- (i) Find the six figure grid reference of . 470. [1]
- (ii) What does 228 (in red colour) in the grid square 6430 mean? [1]
- (iii) If Ms.X living in Gulabganj wanted to lodge a complaint in a police station, in which compass direction would she have to travel? [1]
- (iv) What is the crow-fly distance between the settlements Pamera and Malgaon in km? [1]
- (v) Calculate the area between Eastings 66 to 70 and Northings 28 to 34 in km. [1]
- (vi) What is Scale? [1]
- (vii) (a) State the settlement patterns of the grid squares 6934 and 6631. [2]
(b) Compare the drainage pattern of the grid squares 6728 and 7027.
- (viii) Which is the most important settlement in the given map area? Give a reason for your answer. [2]

Question 2

On the outline map of India provided: [10]

- (i) Draw and label Tropic of Cancer.
- (ii) Mark and label River Cauveri.
- (iii) Mark and name the highest peak in India.
- (iv) Shade and label an area having alluvial soil to the east of ISM.
- (v) Mark and label Wular lake.
- (vi) Mark and name the offshore Oil Field.
- (vii) Shade and label Thar desert.
- (viii) Shade and name the coastal plain which gets rainfall in winter.
- (ix) Draw arrows and name the winds that bring rainfall to Mumbai in June.
- (x) Mark and label Nathu La Pass.

Question 3

Choose the correct answers to the questions from the given options.

[10]

(Do not copy the question, write the correct answers only.)

- (i) When is the winter season experienced in India?
(a) December-February (b) December-January
(c) January-February (d) January-March
- (ii) The process of soil formation is called _____.
(a) Pedagogy (b) Pedology (c) Pedogenesis (d) Philately
- (iii) Assertion (A): Mangroves protect shorelines from storms.
Reason (R): Mangrove vegetation has pneumatophores.
(a) Both A and R are correct and R is the correct explanation of A.
(b) Both A and R are correct and R is not the correct explanation of A.
(c) A is correct but R is incorrect.
(d) R is correct but A is incorrect.
- (iv) Tropical Evergreen forests are found in:
(a) Bihar (b) Chattisgarh (c) Tamil Nadu (d) Andaman and Nicobar Islands
- (v) Which of the following provide water directly to each plant?
(a) Sprinkler irrigation (b) Drip irrigation (c) Well (d) Canal
- (vi) Identify the soil in the picture given below:
- 
- (a) Alluvial (b) Black (c) Red (d) Laterite
- (vii) Which is the leading producer of wind energy?
(a) Jharkhand (b) Odisha (c) Madhya Pradesh (d) Tamil Nadu
- (viii) Which of the following is in the public sector?
(a) Tata Consultancy (b) Amul (c) Reliance Industries (d) State Bank of India
- (ix) The oldest oilfield in India is _____.
(a) Digboi (b) Naharkatiya (c) Mumbai High (d) Ankleshwar
- (x) _____ is the cheapest mode of transport.
(a) Airways (b) Railways (c) Roadways (d) Waterways

PART – II (50 marks)

(Attempt any five questions from this part)

Question 4

- (i) State the economic significance of the following: [2]
(a) Western disturbances
(b) Cherry blossoms
- (ii) Give the geographical reasons for each of the following: [2]
(a) Jaipur has a higher annual range of temperature than Chennai.
(b) Mawsynram receives heavy rainfall.

- (iii) “Monsoon usually hits Delhi around June 30. This year, however, the monsoon arrived in Kerala on May 24, much ahead of the usual date of onset. It reached Mumbai by May 26, 16 days earlier than the usual date. It was reported to be the earliest monsoon onset in the city in 75 years.”

Source Edited: indianexpress.com [3]

- (a) Name the branch of monsoon that gives rainfall to Kerala.
 (b) Why is Delhi getting rainfall almost one month later than Kerala?
 (c) What characteristic of the monsoon can be inferred from the information provided?
- (iv) Study the climatic data given below and answer the following questions: [3]

MONTHS	J	F	M	A	M	J	J	A	S	O	N	D
Temp in °C	23.1	24.8	26.5	29.3	32	32.8	33.1	32.1	30.5	29.3	28.7	26.1
RF in CM	15.3	10.1	0.3	0.1	1.3	4.5	6.1	10.2	10.5	20.1	17.8	19.0

- (a) Calculate the annual range of temperature.
 (b) Calculate the amount of rainfall during the Retreating Monsoon season.
 (c) Suggest a probable name for this station.

Question 5

- (i) Differentiate black soil and red soil on the basis of its formation. [2]
 (ii) According to a study conducted by IIT Bombay, Western Ghats in Gujarat recorded 119% rise in soil erosion in 30 years. [2]
 (a) State any two human activities that might have led to soil erosion in the mentioned region.
 (b) What measures can be taken for the reclamation of this region? (Two points)
 (iii) (a) Name the soil found in the summits of Garo and Khasi hills. [3]
 (b) State two properties of this soil.
 (c) Mention two crops cultivated in this soil.
 (iv) Give geographical reasons for the following statements: [3]
 (a) Different varieties of soil are found in India.
 (b) Alluvial soil is darker in colour in the Deccan coastal strips.
 (c) The Thar desert is steadily progressing eastwards.

Question 6

- (i) Give geographical reasons for the following: [2]
 (a) Different types of natural vegetation are seen in the Himalayas.
 (b) Exploitation of tropical deciduous forests is easy.
 (ii) State any two adaptations of Tropical desert vegetation. [2]
 (iii) From 2021-23, the Northeast lost 327.30 sq km of forest cover. Meghalaya, often [3]
 called the “Scotland of the East,” accounted for 84.07 sq km of the decline.
 Deforestation in the region is frequently linked to traditional agricultural methods, a practice involving the clearing of forest land for temporary farming.

Source edited: [themeghalayanexpress.com](https://www.themeghalayanexpress.com)

- (a) Give the name of the typical type of forest that thrives in Meghalaya.
- (b) State two climatic requirements of this vegetation.
- (c) What is the agricultural practice mentioned here?
- (iv) Van-Mahotsav helps to satisfy aesthetic, economic and protective needs. Elaborate the statement with one reason each. [3]

Question 7

- (i) Why is well irrigation common in Bihar? (Two points) [2]
- (ii) What is a canal? How does it help to make the fields fertile? [2]
- (iii) Study the picture and answer the questions that follow: [3]

- (a) Identify the irrigation method shown in the picture.
- (b) State its one advantage and one disadvantage.
- (iv) Mention any three steps you can take to conserve water as a student. [3]

Question 8

- (i) What is bauxite? Write its one use. [2]
- (ii) Write two differences between Gondwana coal and Tertiary coal. [2]
- (iii) Domestic demand for copper has risen sharply with the emergence of artificial intelligence and data centres, which consume huge amounts of copper for wiring and cooling systems. [3]
 - (a) State two properties of copper that have led to an increase in its demand.
 - (b) Which is the leading copper producing state in India?
 - (c) Name a copper mine located in that state.
- (iv) (a) Which Indian state leads in the production of iron ore? [3]
 - (b) List two important iron ore fields in the state mentioned.

Question 9

- (i) What are footloose industries? Give two examples. [2]
- (ii) Electronics are fundamentally important in modern life. Elaborate the statement with two reasons. [2]
- (iii) (a) Name the Iron and Steel Plant in the private sector in India. [3]
 - (b) Where is it located?
 - (c) From where does it get coal?
- (iv) The Indian petrochemical industry is experiencing significant growth and investment, with a projected increase to a USD 1 trillion market by 2040. This expansion is driven by factors such as increasing domestic demand, government initiatives, and a focus on sustainability and digital innovation. [3]
 - (a) Write any two petrochemical products.
 - (b) Why is there an increasing demand for these products?
 - (c) State any one factor which affects the location of this industry.

Question 10

- (i) Transport is important for economic growth and development of a country. Elucidate the statement with two points. [2]
- (ii) What are the two conditions affecting water transport? [2]
- (iii) Mention any two advantages and one disadvantage of railways in India. [3]
- (iv) Study the picture and answer the questions that follow:

- (a) Identify the highway project shown in the given picture. [3]
- (b) Write any two of its economic benefits.

Question 11

- (i) Explain how Jetstreams and El Nino affect the climate of India. [2]
- (ii) Mention two uses of manganese. [2]
- (iii) Mr. X, a farmer, uses non conventional energy generated from animal and agricultural waste in his house for cooking.
 - (a) Identify the non conventional energy Mr. X used for cooking. [3]
 - (b) Mention two ways in which this energy proves to be beneficial for farmers other than being used as fuel.
- (iv) Give three reasons to explain why Bengaluru is the IT capital of India. [3]

Question 12

- (i) State the difference between alluvial soils found in Uttar Pradesh and West Bengal. [2]
- (ii) Helicopters are fast becoming an important aspect of the aviation industry in India. Give two reasons. [2]
- (iii) Groundwater's role in the Green Revolution is so important that economists like Robert Repetto have called it a tubewell revolution. [3]
Source edited: thehindu.com
 - (a) What are the two advantages of tubewells over normal wells?
 - (b) Mention two states where it is extensively used.
- (iv) (a) Which is the most widespread forest in India? [3]
(b) State two characteristics of this vegetation.
