- (viii) Assertion (A): Labour is considered a perishable factor of production. [1]
Reason (R): If a worker does not work on a particular day, their potential work for that day is lost forever.
(a) Both A and R are true and R is the correct explanation of A. (b) Both A and R are true and R is not the correct explanation of A.
(c) A is true but R is false (d) A is false but R is true

(ix)

Despite applying more fertilizer and better irrigation a farmer sees only small increase in production. Which law is applicable here? Explain. [2]

SECTION B [30 MARKS]

Attempt all questions

Question 2

- (i) How marginal productivity of land is different from average productivity of land? Explain the following determinants of productivity of land: [7]
- (a) Proper use of land.
 - (b) Investment on land.
 - (c) Location.
- (ii) Read the extract given below and answer the questions [8]
- Village X was once known for its vast, fertile agricultural land. Over the past two decades, however, a significant portion of this land has been converted for non-agricultural uses like housing, small factories, and roads. The remaining farmland is facing increasing pressure due to intensive cultivation and lack of proper soil management. Younger generations are increasingly moving away from farming, seeking opportunities in nearby towns.
- Source: Agricultural statistics, local news reports on land use change.
- (a) Identify two key characteristics of land that are highlighted in this case study. Discuss.
 - (b) Explain any two importance of land.

Question 3

- (i) Define ecosystem. Explain any two impacts of the following on the ecosystem: [7]
- (a) Construction of dwelling units.
 - (b) Practice of shifting cultivation.
- (ii) Read the extract given below and answer the questions [8]

A small shoe factory has three main departments: cutting the leather, stitching the upper parts, and attaching the soles. Each department has a team of workers who specialize only in their assigned task. For example, the cutting department only cuts the leather into the required shapes, and they do this for all types of shoes the factory produces.

- (a) Identify and explain the type of division of labour being practiced in this shoe factory.
- (b) Explain any two advantages and two disadvantages of the type of division of labour mentioned in the above extract.
